

FLEXUS SURR 200

WIRELESS DOLBY ATMOS SURROUND SOUND SPEAKERS

POWERED BY ONKYO

We've teamed up with Onkyo, combining their decades of proven manufacturing and tech prowess with our classic Klipsch acoustics, to ensure your home entertainment system is as epic in audio quality as it is in reliability.

REACH FOR THE STARS

The Flexus Surr 200 speakers include two 3" up-firing drivers and two 3" front-firing drivers for the ultimate Dolby Atmos experience overhead and all around you. Immerse yourself in engaging surround sound from your favorite blockbuster, just like at the movies.

SIMPLE, FLEXIBLE

With controls, power and LED lights hidden below the surface, you have zero distractions in a pitch-black room – just awesome sound and clean aesthetics. This convenient location for the 1/4"-20 threaded insert also allows the Surr 200 to be wall mounted for maximum immersion or used on a flat surface.

INDEPENDENTLY POWERED

We're keeping it simple: no adapters, no dongles, no speaker wires to fuss with here. Each Flexus Surround Speaker independently plugs into a wall outlet with one discrete power cable, no cables required between speakers or lying on the floor.
